Subject: Fresh Marquis Reagent

All,
Fresh Marquis is available with labels in the Reagent Book.

With everyone in different areas at this moment (court, at home, etc.), let me point out that the critical issue in replacing your Marquis after two months is not how fast you do it. Rather, the issue is that you replace it with fresh before you do your next case. I like to leave the material out, in the hood, for everyone's convenience, for a day or two. After which I will return it to the storage cabinet.

Mike
